Software Project ~ *Lecture 1*

Shahar Perets

April 23, 2026

Lecture by Dr. Mahmood Sharif

Why C?

- C is *compact*: there are few reserved keyword, and powerful set of operators
- C is *efficient*: no interpretation layer
- C is *Modular* and *Typed*
- C is the native language of UNIX
- C is the basis of C++

C vs. Java

- Java is somewhat based on C
- C is procedural and not object-oriented
- There's no GC in C

Other notes

We follow "The Book of C" in this semester.
